Accepted abstracts and information about presentation

Information for presenters

You will have 20 minutes for presenting your paper. This time includes questions from the audience. We suggest that you plan to deliver just about 1,500 – 1,750 words. You will be able to have a substantially longer edited paper of 4,000 words printed in the proceedings.

We suggest you bring with you copies of your paper – about 20 should be sufficient – to distribute to the audience. If there are not enough copies, you could collect e-mail addresses and send out copies when you get home. ***Please note that we cannot make copies for you at the conference.***

If you are using PowerPoint, you are advised to make sure that the presentation is loaded BEFORE the session, before the first speaker starts. Please make sure to save your work in a format compatible to Microsoft Office (2000 or later). Computers and projectors will be available in every room of the conference.
